

Rally Health Check

At a Glance

Transforming to put agile development at the heart of what you do is key to ensuring your business can respond quickly and confidently and deliver value faster. Reaching this goal requires change and managing this change can be difficult alongside other priorities. A Rally Health Check assesses the current state of agile development at your organization, alongside your implementation and usage of Rally, and provides support and guidance to ensure you are maximizing your investment.

Key Outcomes

- Agile Improvement:**

Guidance and clear next steps for a successful agile transformation.

- Maximize your Investment:**

Ensure you are making best use of the available capabilities of Rally.

- Seamless Development:**

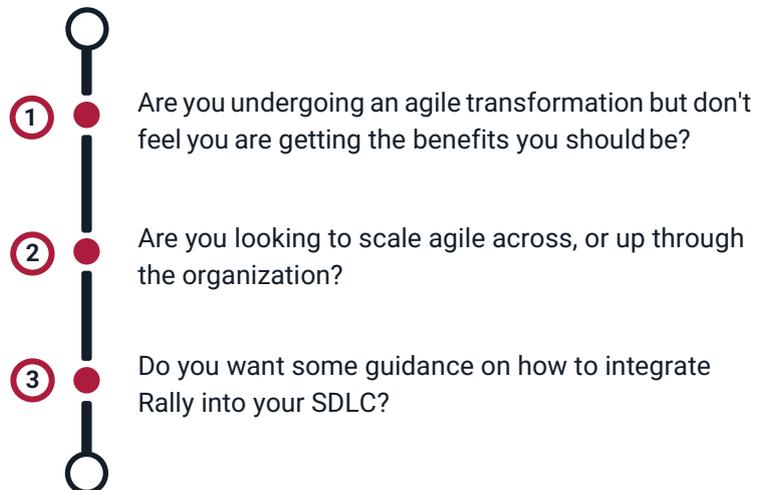

Learn how Rally can be integrated within your development ecosystem.

Key Features

- Review of how well your current agile development practices are working.
- Guidance on the best configuration of Rally to support your particular approach to agile development.
- Training and support needs identified.
